PROJECTS

VRBO(vacation rentals by owner) Clone
This project offers a scalable web application that replicates core Vrbo functionalities such as user authentication, property listing, and booking management.
• Users can explore, book, and manage rental properties with a responsive interface, providing an interactive experience closely modeled after Vrbo's user-centric design.
• Technology Used: NodeJs, ExpressJs, MongoDB, ReactJs

RESTAURANT-MANAGEMENT
• Users can browse the menu, add items to the cart, and place orders in real-time with seamless interactions.
• The system includes an admin panel for managing menu items, tracking orders, and generating sales reports efficiently.

• **Technology used:** HTML, CSS, JavaScript. (Dec 2024) **CERTIFICATION**

• PHP/MySql/Java Test Spoken Tutorial by IIT Bombay.
• Sql Certification from Geekster.
ADDITIONAL

- **Tech-Savvy Developer:** Enthusiastic B.Tech CSE student with expertise in web development(MERN), Java, and PHP, focused on building efficient applications.
- **Strong Communication & Multilingual Skills:** Excellent communicator, fluent in English and Hindi, ensuring smooth collaboration and project discussions..
